

TEXT-BOOK  
ON  
**PRACTICAL ASTRONOMY**

BY

**GEORGE L. HOSMER**

*Associate Professor of Topographical Engineering, Massachusetts  
Institute of Technology*

***SECOND EDITION, REVISED***

**TOTAL ISSUE, FOUR THOUSAND**

NEW YORK  
**JOHN WILEY & SONS, INC.**  
**LONDON: CHAPMAN & HALL, LIMITED**  
1917

## TABLE OF CONTENTS

---

### CHAPTER I

#### THE CELESTIAL SPHERE—REAL AND APPARENT MOTIONS

ART.		PAGE
1.	Practical Astronomy.....	1
2.	The Celestial Sphere.....	1
3.	Apparent Motion of the Sphere.....	3
4.	The Motions of the Planets.....	3
5.	Meaning of Terms East and West.....	6
6.	The Earth's Orbital Motion — The Seasons.....	7
7.	The Sun's Apparent Position at Different Seasons.....	9
8.	Precession and Nutation.....	10
9.	Aberration of Light.....	12

### CHAPTER II

#### DEFINITIONS — POINTS AND CIRCLES OF REFERENCE

10.	Definitions.....	14
	Vertical Line — Zenith — Nadir — Horizon — Vertical Circles — Almucantars — Poles — Equator — Hour Circles — Par- allels of Declination — Meridian — Prime Vertical — Ecliptic — Equinoxes — Solstices — Colures.	

### CHAPTER III

#### SYSTEMS OF COÖRDINATES ON THE SPHERE

11.	Spherical Coördinates.....	18
12.	The Horizon System.....	19
13.	The Equator Systems.....	19
15.	Coördinates of the Observer.....	22
16.	Relation between the Two Systems of Coördinates.....	23

## TABLE OF CONTENTS

## CHAPTER IV

## RELATION BETWEEN COÖRDINATES

ART.		PAGE
17.	Relation between Altitude of Pole and Latitude of Observer . . . . .	27
18.	Relation between Latitude of Observer and the Declination and Altitude of a Star on the Meridian . . . . .	30
19.	The Astronomical Triangle . . . . .	31
20.	Relation between Right Ascension and Hour Angle . . . . .	36

## CHAPTER V

## MEASUREMENT OF TIME

21.	The Earth's Rotation . . . . .	39
22.	Transit or Culmination . . . . .	39
23.	Sidereal Day . . . . .	39
24.	Sidereal Time . . . . .	40
25.	Solar Day . . . . .	40
26.	Solar Time . . . . .	40
27.	Equation of Time . . . . .	41
28.	Conversion of Apparent Time into Mean Time and <i>vice versa</i> . . . . .	43
29.	Astronomical and Civil Time . . . . .	44
30.	Relation between Longitude and Time . . . . .	45
31.	Relation between Sidereal Time, Right Ascension and Hour Angle of any Point at a Given Instant . . . . .	48
32.	Star on the Meridian . . . . .	49
33.	Relation between Mean Solar and Sidereal Intervals of Time . . . . .	49
34.	Relation between Sidereal and Mean Time at any Instant . . . . .	52
35.	Standard Time . . . . .	56
36.	The Date Line . . . . .	58
37.	The Calendar . . . . .	59

## CHAPTER VI

THE AMERICAN EPHEMERIS AND NAUTICAL ALMANAC—STAR  
CATALOGUES—INTERPOLATION

38.	The Ephemeris . . . . .	62
39.	Star Catalogues . . . . .	65
40.	Interpolation . . . . .	68

## TABLE OF CONTENTS

vii

## CHAPTER VII

THE EARTH'S FIGURE—CORRECTIONS TO OBSERVED ALTITUDES		PAGE
<b>Art.</b>		
41.	The Earth's Figure.....	72
42.	Parallax.....	73
43.	Refraction.....	76
44.	Semidiameters.....	78
45.	Dip.....	79
46.	Sequence of Corrections.....	80

## CHAPTER VIII

## DESCRIPTION OF INSTRUMENTS—OBSERVING

47.	The Engineer's Transit.....	82
48.	Elimination of Errors.....	83
49.	Attachments to the Engineer's Transit — Reflector.....	86
50.	Prismatic Eyepiece.....	87
51.	Sun Glass.....	87
52.	The Portable Astronomical Transit.....	87
53.	The Sextant.....	88
54.	Artificial Horizon.....	91
55.	Chronometer.....	92
56.	Chronograph.....	93
57.	The Zenith Telescope.....	94
58.	Suggestions about Observing.....	95

## CHAPTER IX

## THE CONSTELLATIONS

59.	The Constellations.....	98
60.	Method of Naming Stars.....	98
61.	Magnitudes.....	99
62.	Constellations near the Pole.....	99
63.	Constellations near the Equator.....	100
64.	The Planets.....	102

## CHAPTER X

## OBSERVATIONS FOR LATITUDE

65.	Latitude by a Circumpolar Star at Culmination.....	103
66.	Latitude by Altitude of the Sun at Noon.....	105
67.	Latitude by the Meridian Altitude of a Southern Star.....	107

## TABLE OF CONTENTS

Art.		PAGE
68. Latitude by Altitudes Near the Meridian.....		108
69. Latitude by Polaris when the Time is Known.....		110
70. Precise Latitude Determinations — Talcott's Method.....		112

## CHAPTER XI

## OBSERVATIONS FOR DETERMINING THE TIME

71. Observations for Local Time.....		114
72. Time by Transit of a Star.....		114
73. Observations with Astronomical Transit.....		117
74. Selecting Stars for Transit Observations.....		117
75. Time by Transit of the Sun.....		119
76. Time by Altitude of the Sun.....		120
77. Time by Altitude of a Star.....		123
78. Time by Transit of Star over Vertical Circle through Polaris.....		124
79. Time by Equal Altitudes of a Star.....		127
80. Time by Two Stars at Equal Altitudes.....		128
83. Rating a Watch by Transit of a Star over a Range.....		135
84. Time Service.....		136

## CHAPTER XII

## OBSERVATIONS FOR LONGITUDE

85. Methods of Measuring Longitude.....		139
86. Longitude by Transportation of Timepiece.....		139
87. Longitude by the Electric Telegraph.....		140
88. Longitude by Transit of the Moon.....		141

## CHAPTER XIII

## OBSERVATIONS FOR AZIMUTH

89. Determination of Azimuth.....		146
90. Azimuth Mark.....		146
91. Azimuth by Polaris at Elongation.....		147
92. Observations near Elongation.....		149
93. Azimuth by an Altitude of the Sun.....		151
94. Azimuth by an Altitude of a Star.....		155
95. Azimuth Observation on a Circumpolar Star at any Hour Angle.		155
96. The Curvature Correction.....		158

## TABLE OF CONTENTS

ix

ART.		PAGE
97.	The Level Correction.....	158
98.	Diurnal Aberration.....	158
99.	Meridian by Polaris at Culmination.....	161
100.	Azimuth by Equal Altitudes of a Star.....	164
101.	Observation for Meridian by Equal Altitudes of the Sun.....	165
102.	Observation of the Sun near Noon.....	166
103.	Approximate Azimuth of Polaris when the Time is Known....	167

## CHAPTER XIV

## NAUTICAL ASTRONOMY

104.	Observations at Sea.....	170
	Determination of Latitude at Sea:	
105.	Latitude by Noon Altitude of the Sun.....	170
106.	Latitude by Ex-Meridian Altitudes.....	171
	Determination of Longitude at Sea:	
107.	Longitude by the Greenwich Time and the Sun's Altitude....	172
108.	Longitude by the Lunar Distance.....	172
109.	Azimuth of the Sun at a Given Time.....	174
110.	Azimuth of the Sun by Altitude and Time.....	175
111.	Sumner's Method of Determining a Ship's Position.....	175
112.	Position by Computation.....	178

## TABLES

I.	MEAN REFRACTION.....	184
II.	CONVERSION OF SIDEREAL INTO SOLAR TIME.....	185
III.	CONVERSION OF SOLAR INTO SIDEREAL TIME.....	186
IV.	(A) SUN'S PARALLAX — (B) SUN'S SEMIDIAMETER — (C) DIP OF HORIZON.....	187
V.	TIMES OF CULMINATION AND ELONGATION OF POLARIS.....	188
VI.	CORRECTION TO OBSERVED ALTITUDE OF POLARIS .....	189
VII.	VALUES OF FACTOR $112.5 \times 3600 \times \sin r'' \times \tan Z_e$ .....	190
	GREEK ALPHABET .....	190
	LIST OF ABBREVIATIONS.....	191
